

Description:

The passive linear array subwoofer consists of a 18" woofer. It adopts the compressed acoustic design to enable farther sound transmission. It is required to work with the full-range linear array speakers. And it is suitable for various small and medium performances, theaters, auditoriums, banquet halls, multipurpose halls and other high-end venues.

Feature:

- * Adopt an 18" woofer with high efficiency and high sensitivity.
- * High-quality high-density birch wood housing, precise CNC processing.
- * Professional speaker sockets and plugs have good electrical characteristics.
- * Emery spraying process, high-end and wear-proof surface.

Specification:

Model	TK-S180
Speaker type	Linear array subwoofer
Nominal impedance	8Ω
Frequency range	35Hz-250Hz
Rated power	800W
Peak power	3200W
Sensitivity	102dB/W/m
Maximum SPL(rated/peak)	131dB/137dB
Woofer	18"×1
Net weight	49.7kg
Dimension	575×924×700mm (H×W×D)
